

表2 脳卒中・その他の脳疾患（2006年）

2編以上の論文に使用された評価法を示す。

評価法	論文数
Functional independence measure, FIM	25
Mini-mental state examination, MMSE	18
Barthel index, BI, バーセル指数	16
Fugl-Meyer assessment	14
Ashworth scale-modified, MAS	10
Berg balance scale, BBS	10
National Institutes of Health stroke scale, NIHSS	8
Medical outcomes study short form-36 health survey, SF-36	7
Timed up & go test	7
Motricity index, MI	6
6 minute walk test, 6MWT	5
Action research arm test, ARAT	5
Ashworth scale	5
Brunnstrom stage	5
Geriatric depression scale, GDS	4
Trunk control test ,TCT	4
Activities-specific balance confidence scale, ABC	3
Frenchay activities index, FAI	3
Functional Ambulation Categories rating	3
modified Rankin scale, mRS	3
Motor Assessment Scale, MAS	3
Rivermead mobility index, RMI	3
Behavioural inattention test	2
Birgitta lindmark motor assessment	2
Center for epidemiological studies-depression scale, CES-D	2
Chedoke-McMaster stroke assessment	2
Motor Activity Log, MAL	2
Revised Hasegawa dementia scale	2
Scandinavian stroke scale	2
Sickness impact profile, SIP	2
Token test	2
